## CAREER OBJECTIVES

I am an experienced front-end developer with over one year of industry experience, demonstrating the ability to create intuitive user interfaces. Familiar with front-end development concepts, I am a goal-driven individual seeking opportunities to work in a professional environment and expand my knowledge and skills. I aspire to transition into a full-stack developer role.

## EDUCATION

VNUHCM - University of Information Technology (UIT)	Sep 2015 - Jun 2021
Computer Engineering (embedded and robotics)	
• GPA: 2.76/4 (6.9/10)	
• Graduation thesis: 9.3/10	

## WORK EXPERIENCE

ProtonX	Sep 2022 - Apr 2024
Front-End Developer	
Developed an education website to help users create and manage their content and students more efficiently. This website utilizes the MERN stack:	
• Designed and improved the user interface for a website that allows teachers to create and manage classes and necessary teaching materials.	
• Developed a user-friendly interface for students with features that support the learning process.	
• Implemented automated email tools and integrated AI for content creation.	
• Designed APIs for CRUD tasks using Express.js and MongoDB.	
• Developed an advertising website for courses using Next.js, optimizing it for SEO.	
• Deployed the website on Cloudflare.	
Technologies used: React.js, Bootstrap, Redux, Next.js, Node.js, Express.js, MongoDB.	

The University of Information Technology	Jun 2019 - Mar 2021
Research Assistant	
Researched basic and modern neural network architectures, focusing on sensitive object detection using the YOLO model.	
Technologies used: Python, Tensorflow, YOLO.	

## SKILLS

- Linux
- Git
- React.js
- Node.js
- Express.js
- MongoDB

## CERTIFICATIONS

TOEIC 510	2020 - 2022
